

**Fourth Meeting of the Global Low Level Presence Initiative (GLI)**

The key objective of the GLI is to foster collaborative work to develop practical approaches designed to facilitate the management of LLP globally and the international trade of agriculture commodities. The GLI emphasizes senior level information exchange on trade risks posed by LLP and collaboration on exploring solutions to LLP. This has resulted in the GLI undertaking work on various discussion papers and statements, including exploring opportunities to reduce asynchronous approvals and identifying considerations for LLP thresholds. The GLI does not impose commitments to reach binding policy agreements.

**Objectives for the 4th GLI meeting:**

- Strive to endorse the following documents: (1) the Rules of Procedure of the GLI, (2) the GLI Statement on Asynchronous Authorizations, and (3) the GLI Statement on Data Transparency;
- Continue and advance the dialogue on threshold considerations;
- Develop and agree on an ambitious updated International Workplan on LLP; and,
- Facilitate a comprehensive and informed discussion on LLP policy approaches and models.
